Group: A = Amphibians, B = Birds, F = Fish, I = Invertebrates, M = Mammals, P = Plants, R = Reptiles

S: in case that the data on species are sensitive and therefore have to be blocked for any public access enter: yes

NP: in case that a species is no longer present in the site enter: x (optional)

Type: p = permanent, r = reproducing, c = concentration, w = wintering (for plant and non-migratory species use permanent)

Unit: i = individuals, p = pairs or other units according to the Standard list of population units and codes in accordance with Article 12 and 17 reporting (see [reference portal](#))

Abundance categories (Cat.): C = common, R = rare, V = very rare, P = present - to fill if data are deficient (DD) or in addition to population size information

Data quality: G = 'Good' (e.g. based on surveys); M = 'Moderate' (e.g. based on partial data with some extrapolation); P = 'Poor' (e.g. rough estimation); VP = 'Very poor' (use this category only, if not even a rough estimation of the population size can be made, in this case the fields for population size can remain empty, but the field "Abundance categories" has to be filled in)

4.2 Quality and importance

The site is one of the most important in Bulgaria for the preservation of different kinds of riverine habitats - alluvial forests, old river beds, flooded areas. It has rich hydrophilous flora and fauna including many rare species as Trapa natans, fishes, invertebrates, birds, mammals.

Code	Cover [%]	Code	Cover [%]	Code	Cover [%]
BG06	0.893	BG03	0.069	BG00	99.038

5.2 Relation of the described site with other sites:

designated at national or regional level:

Type code	Site name	Type	Cover [%]

BG06	Ormana	+	0.021
BG06	Cholashki orman	+	0.872

5.3 Site designation (optional)

The Iskar River has the most preserved complex of different alluvial forest habitats in Northern Bulgaria. This is the biggest river in the North part of Bulgaria. The diversity of bird species is big. Many of the old river beds now are marshes with different aquatic communities.
